

SERVICE OVERVIEW

Saviynt Quick Start Packages by iC Consult

Accelerate Your Saviynt Journey with Proven Quickstart Packages

Getting started with Identity Governance can be complex, but it doesn't have to be slow. iC Consult's packaged offerings help you **launch or expand your Saviynt IGA program** with clarity, speed, and confidence. Explore a range of packages designed to meet you where you are:

- **Foundation packages** to define strategy, assess readiness, and establish a scalable baseline.
- **Implementation package** for full Saviynt rollout with automated lifecycle, governance, and integrations.
- **Focused accelerators** targeting specific goals like securing external users, streamlining access certifications, or enforcing Segregation of Duties.

Each package is built on real-world expertise, proven delivery patterns, and native Saviynt capabilities. Explore the packages and find the right fit for your current needs.

Packages Overview

Foundation & Readiness Packages

IGA Advisory Foundation

Define your IGA roadmap with workshops, gap analysis, and Saviynt alignment.

2-3 weeks

Rapid Start IGA Foundation

Deploy a production-ready Saviynt setup with HR integration and JML automation.

4-5 weeks

Core IGA Implementation Package

Accelerated IGA Starter

Launch full IGA with JML, 5 apps, SSO, dashboards, and certifications.

12-14 weeks

Focused Accelerator Packages

External User Lifecycle Accelerator

Govern third-party identities with onboarding, access workflows, and lifecycle automation.

12-14 weeks

CertifyFast Campaign Accelerator

Implement user and entitlement certifications with templates, tracking, and audit dashboards.

8-9 weeks

Rapid SOD Accelerator

Enable SOD controls and conflict detection with rulesets, reporting, and real-time analytics.

10-12 weeks

IGA Advisory Foundation

2-3 weeks

Define your strategy. Accelerate your identity success.

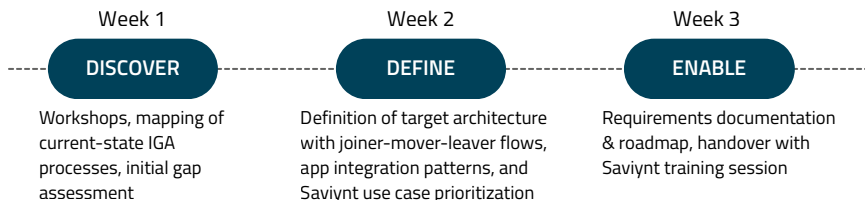

This advisory package helps you define the right foundation for your Saviynt IGA program. In 2-3 weeks, you get a clear view of your current state, a prioritized roadmap, and the documentation needed to start implementation with confidence.

Best suited for: New Saviynt programs (greenfield), migrations, or system integrator project handovers.

Your Benefits

- ✓ Clear understanding of your IGA maturity and readiness
- ✓ A prioritized, phased roadmap for Saviynt adoption
- ✓ Identified gaps, risks, and architectural recommendations
- ✓ Stronger alignment between business requirements and technical implementation
- ✓ Faster decision-making and stakeholder buy-in

Timeline (2-3 Weeks)

What's Included

Workshops & Discovery

- High-level IGA assessment
- Capture current processes and Saviynt-aligned requirements

Gap Analysis

- Identify gaps between current needs and Saviynt capabilities
- Analysis of application connectivity (REST/AD/SAP), JML feasibility, and custom workflow scoping
- Detailed Gap report with prioritized findings, architectural recommendations, and Saviynt capability mapping

Roadmap & Enablement

- Saviynt product briefing for stakeholders, covering access requests, certifications, SOD rulesets, and ISPM sprawl controls
- **Deliverables:** IAM Business Requirements Document, Saviynt Roadmap with phased use cases, Project Initiation Plan

Rapid Start IGA Foundation

Fast-track your first Saviynt deployment

4-5 weeks

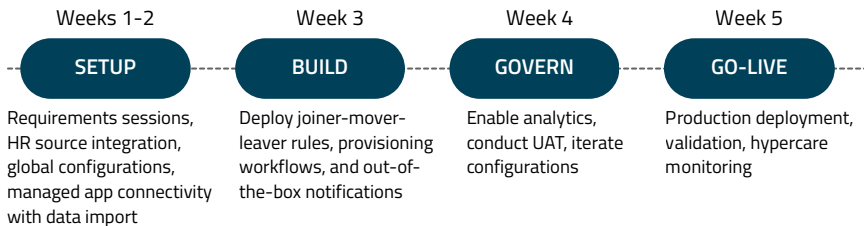

This package delivers a production-ready Saviynt IGA foundation in just 4-5 weeks. It includes core joiner-mover-leaver (JML) automation, initial HR and application integration, and baseline governance, all built for fast value and future scale.

Best suited for: New Saviynt customers (greenfield) starting with a lightweight foundational deployment designed to scale to a full enterprise-grade IGA platform.

Your Benefits

- ✓ Quick go-live with core IGA functionality
- ✓ Automated Joiner-Mover-Leaver provisioning
- ✓ Seamless integration with your HR system and one business-critical application
- ✓ Pre-configured governance for faster value
- ✓ Foundation that supports future expansion

Timeline (4-5 Weeks)

What's Included

Setup & Configuration

- Targeted workshops to define HR-driven use cases
- Single HR source integration (Connected Application) for user birthright access
- Single managed application integration (REST/API or on-prem connector) with import and provisioning configurations
- Global Saviynt configurations: email templates, username/system username generation rules

Lifecycle Automation

- Basic JML rules: joiner birthright provisioning, mover role updates, leaver deprovisioning
- Out-of-the-box email notifications for JML lifecycle events

Analytics & Launch Support

- Activation of 5 key out-of-the-box analytics (user counts, entitlements, access trends).
- User Acceptance Testing (UAT) cycles
- Production deployment, and post-go-live hypercare support

iC Consult Accelerated IGA Starter Package

12-14 weeks

Full-scale IGA rollout with JML, SSO, and app integration

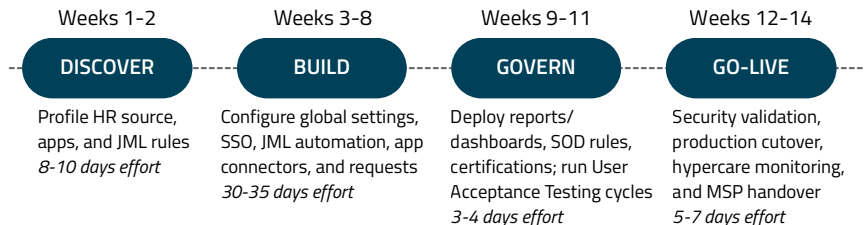

This package delivers a complete Saviynt IGA implementation in 12-14 weeks through a single, focused rollout. It includes automated JML processes, SSO, 5 application integrations, and core governance features.

Best suited for: New Saviynt customers (greenfield) looking to implement a complete IGA foundation.

Your Benefits

- ✓ End-to-end Joiner-Mover-Leaver automation
- ✓ Integration with your HR system + 5 core apps
- ✓ SSO, access requests, and approvals built-in
- ✓ Native Saviynt certifications and risk analytics
- ✓ Custom dashboards for visibility and decision-making
- ✓ Rapid time to value with strong operational coverage

Timeline (12-14 Weeks)

What's Included

Core Build & Configuration

- Requirements workshops to finalize needs for JML, app onboarding, and reporting
- Global configurations: custom naming logic (username/system username/email logic), UI branding with logos and colour schemes
- SSO enablement for internal users via SAML integration
- Single HR source for JML automation (25 rules covering hire, role/department changes, termination) with email notifications
- 5 app connectors (on-prem/cloud) for provisioning/de-provisioning and basic access requests with 1-2 level approvals

Governance Enablement

- 5 out-of-the-box analytics/reports + 5 custom dashboards with tiles/graphs and drill-downs
- Manager access certifications for core apps using Saviynt native workflows
- **Saviynt-native value add:** 1-2 SOD/toxic combo rules via Endpoint & Policy Violation analytics for immediate risk visibility

Testing & Go-Live

- UAT support, production deployment, MSP handover
- 2-week of hypercare support

External User Lifecycle Accelerator

Govern third-party access with full lifecycle automation

12-14 weeks

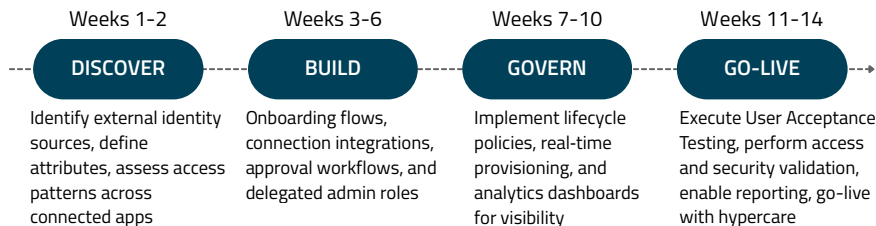

This package helps you establish secure, governed access for external users using Saviynt. In 12-14 weeks, you'll deploy an external identity management foundation that delivers secure onboarding, lifecycle automation, and governance for all third-party and partner users.

Best suited for: Organizations without existing external user management in Saviynt.

Your Benefits

- ✔ Enable secure onboarding for external users via self-registration, invitation, or SSO
- ✔ Automate full external identity lifecycle: creation, updates, deactivation
- ✔ Establish approval workflows and governance policies for external access
- ✔ Gain visibility through real-time dashboards and policy monitoring
- ✔ Reduce manual effort and risk with automated provisioning and controls

Timeline (12-14 Weeks)

What's Included

Setup & Configuration

- Business and technical workshops to finalize external user use cases and data needs
- Integration of external identity sources (connected or flat-file/disconnected modes) for authentication and attribute synchronization
- Configuration of global Saviynt settings: roles, naming conventions, UI branding, attribute generation (usernames, emails, identifiers)
- Flexible onboarding setup: self-registration, invitation-based workflows, or SSO federation

Lifecycle Automation

- Multi-level approval workflows with escalation handling and email notifications for external access requests
- Fully automated lifecycle management for external users (onboarding, profile updates, deactivation) with Just-in-Time access provisioning

Governance & Risk Insights

- Governance dashboards, policy controls, real-time access monitoring
- **Optional Add-on:** Saviynt ISPM QuickScan integration for privileged external account cleanup and toxic combination detection

Testing & Deployment

- UAT support and validation
- Production deployment and hypercare stabilization

CertifyFast Campaign Accelerator

Launch targeted access certifications fast and audit-ready

8-9 weeks

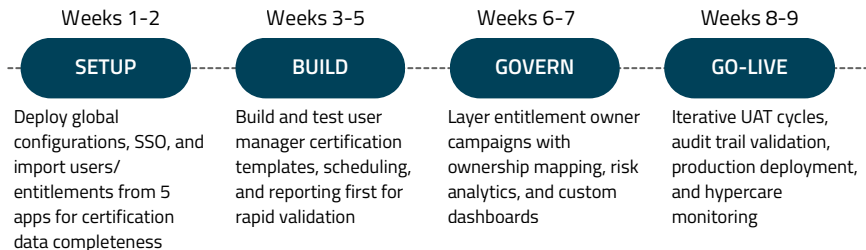

This package enables you to quickly implement core Saviynt recertification capabilities, focusing on user manager reviews and entitlement owner certifications.

Best suited for: Saviynt customers with an existing user population, looking to implement access certifications as a new capability.

Your Benefits

- ✓ Run access reviews for employees, contractors, and entitlements
- ✓ Ensure audit readiness with tracking, delegation, and evidence reporting
- ✓ Increase campaign efficiency with pre-built templates and dashboards
- ✓ Improve visibility and accountability with certification analytics
- ✓ Strengthen governance without manual effort or delays

Timeline (8-9 Weeks)

What's Included

Certification Configuration

- Saviynt global configurations optimized for certifications: custom user and entitlement naming conventions, certification-specific UI branding
- SAML SSO for seamless user manager and entitlement owner access to certification campaigns
- Saviynt email templates and notifications for certification reminders, escalations, and completion alerts

Campaign Setup

- Integration of 5 key applications (on-prem, API, or disconnected via schema imports) to populate accounts and entitlements for certification templates
- Pre-built Saviynt certification templates for user manager reviews (direct/indirect reports) and entitlement owner campaigns (access ownership validation)
- Out-of-the-box Saviynt certification controls activated: campaign scheduling, delegation rules, and completion tracking for audit evidence

Governance & Visibility

- 5 Saviynt certification analytics enabled (e.g., completion rates, overdue items, risk-based prioritization)
- 5 custom Saviynt certification dashboards for user manager and entitlement owner visibility and audit reporting
- UAT support, production deployment, and 2-week hypercare focused on certification campaign execution

Rapid SOD Accelerator

10-12 weeks

Deploy Segregation of Duties controls with speed and precision

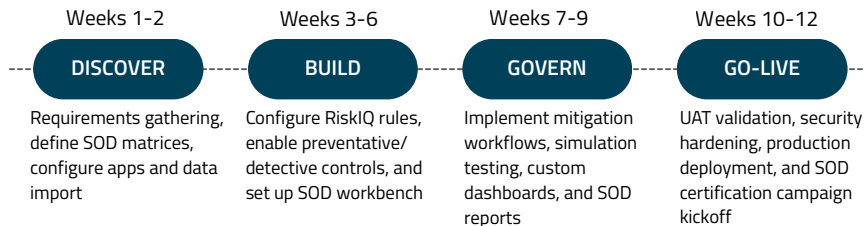

This package helps you establish Saviynt's Segregation of Duties (SOD) controls in just 10–12 weeks, enabling immediate conflict detection and compliance across key applications.

Best suited for: Saviynt customers with an existing user population, looking to implement Segregation of Duties controls and risk analytics as a new capability.

Your Benefits

- ✓ Enforce preventative and detective SOD controls
- ✓ Define and detect conflicting access across apps
- ✓ Improve audit readiness with dashboards and reports
- ✓ Reduce risk with simulation testing and mitigation workflows
- ✓ Get a fast start using Saviynt's native RiskIQ engine

Timeline (10-12 Weeks)

What's Included

SOD Rule Definition & Controls

- Configure 2 intra-app SOD rulesets (or 1 inter-app matrix) using Saviynt RiskIQ rules engine for conflict definitions
- Enable native preventative (real-time blocking) and detective (post-access alerts) controls

Application Onboarding

- Onboard 3 non-SAP applications with full account and entitlement import into the Saviynt SOD warehouse

Reporting & Dashboards

- Activate out-of-the-box SOD violation reports and analytics
- Deploy 2–3 SOD-focused dashboards tracking violations, mitigation, and remediation
- Implement 2 custom mitigation workflows for use in approvals or the SOD workbench

Testing & Go-Live

- Conduct Saviynt SOD simulation testing to validate rule accuracy
- Configure global SOD settings
- UAT cycles, production deployment, and hypercare

Partner with iC Consult to Fast-Track Your Saviynt Success
